

Why hire one developer when you can hire a whole team of expert software developers for the same price? We're Digilogik, an offshore development team based in Indonesia. Our senior developer contractor rates are significantly more cost effective than your typical developer salaries in Australia.

Not only that, you'll also get the combined skills and knowledge from our teams of software developers across tech stacks, business analysts, project managers, testers and DevOps engineers. We have been in business for more than 5 years, trusted by clients in Australia, New Zealand, USA and Singapore. Our team members have worked at various business levels from startups (3 million USD seed funding, 123RF), multinationals (Macquarie Bank, M1 Telecom, Reebonz), large corporations (Astra Group, Chevron Pacific), financial institutions (KBank Thailand, Singapore Exchange Board), national flag carrier to government entities (Telkom Indonesia, Singaporean Tourism Board, NTUC).

With the proliferation of AI tools that can auto generate resumes and cover letters based on job ads, it is becoming far more difficult for employers like yourself to differentiate between candidates. We would like to offer a solution.

We offer zero-risk engagement models where you only pay when there are tasks. No monthly commitments. You want to upgrade dev resources? We'll arrange that for you. Need to scale-down? Then feel free to pause the engagement. No severance commitments, no risk.

Here's our team's resume for your consideration:

RECENT NOTABLE ACHIEVEMENTS

🕒 Flagship Airline Training and Rewards Application

Took over (was previously in a 3-year "development hell" with another software house), architected and implemented a comprehensive training and rewards web application for New Zealand flagship airline. They have been hugely successful in Australia and New Zealand. Currently expanding for Southeast Asia markets.

🕒 Go Live of \$3 Million Funded AI Fintech

Lead development team in implementing web application for an AI Fintech startup, successfully delivering the project on time and on budget. Company valued at \$20 million (2025).

🕒 Project Turnaround Specialist

Transformed struggling 1.5-year project plagued by missed deadlines and excessive bugs into stable and performant software by rewriting application from a complex Angular Nodejs microservices to a simpler Vue.js Java multi-tenant monolith. Reduced number of reported bugs from 15+ every two weeks to 0.

🕒 Virtual Exhibition Platform Launch

Lead team of 8 implemented virtual exhibition platform over just 2 months. Platform now has many integrations with third party software, e.g. Zoom, Teams, Zapier and has expanded to include clinics/suites and expanding into the LMS (learning management system) space.

🕒 Information Exchange Platform for Australian National Distributor

Implemented an information exchange platform for 14 thousand customer companies and 92 supplier companies, successfully launching version 1 and 2 with version 3 currently in the pipeline for enhanced functionality.

🔵 Rapid Sponsorship Tracking System

Guided the team in implementing a sponsorship allocation tracking platform, from initial concept to production launch, over 5-week timeframe.

🔵 Cloud Cost Reduction

Delivered significant cost savings for client, achieving a 59% reduction in monthly AWS expenses through redesign of multi-tenancy solution, monitoring of usage and overall system architecture.

🔵 Event Ticketing Platform

Delivered a critical event ticketing platform over 2 months, supporting more than 30,000 users and processing 100,000+ presale transactions with near-zero critical bugs, ensuring seamless access and user experience.

🔵 Performance & Migration

Performance Optimisation of Python Scripts. Achieved a 20-fold improvement in the performance of Python scripts, reducing processing time from over an hour to just 5 minutes. Enabled distributed processing of millions of records, optimising workflows in chemical data analysis. Achieved by analysing data and synthesising appropriate data structures and algorithms. Next-Gen Frontend Migration (Vue 3) Migrated 50+ UI components and core business logic to Vue 3 with Nuxt 3, enhancing UX and reducing client-side errors by 50%.

ERP Data Integration & Billing Automation. Integrated real-time billing and payment dashboard by connecting ERP data feeds, reducing manual reconciliation time by 80%.

🔵 E-commerce & Expansion

Cross-Border E-commerce Conversion Lift. Led end-to-end development of cross-border e-commerce platform for AU/NZ markets, integrating live TV streaming sales model with real-time agent chat, resulting in 30% increase in conversion rate.

🔵 Corporate Governance & Internal Systems

Governance & Compliance Platform Adoption. Co-developed Whistleblowing System (WBS) for Good Corporate Governance (GCG), adopted by 8+ public institutions to reduce compliance violations by streamlining anonymous reporting.

High-Availability Internal Audit System. Built Internal Audit Online (IAO) platform from the ground up using Laravel, supporting audit workflows for 50+ internal users with 99.8% uptime.

AVAILABLE ROLES

Developers: Java, .Net, JavaScript/TypeScript, native Android & iOS, PHP (GoLang by request), frontend, backend or fullstack.

QA/Testers: manual and automated

DevOps Engineers (AWS, Azure, GCP)

Business Analysts

Project Managers

Graphic Designers, UI/UX Experts

SKILLS & EXPERIENCES

Java: SpringBoot, Quarkus, JVM instrumentation and profiling, Guice, MyBatis, Hibernate, Struts, Ant, Maven
.Net: C#, Entity Framework
PHP: Laravel, CodeIgniter, Twig
Node: JavaScript/TypeScript, npm, yarn, vite, ExpressJS, React, Vue,
SQL, MySQL, MariaDB, PostgreSQL, Sybase, SQL Server
NoSQL, Cosmos DB, MongoDB, Neo4J, Redis
Python, Perl
GoLang (by request)
Android native Java/Kotlin, iOS native, Firebase
HTML, CSS, SCSS, Bootstrap, Tailwind, Vuetify

AI: SageMaker, n8n
PowerBI
Git, Mercurial, Subversion
RabbitMQ, Kafka, JasperReports, Lucene
Linux administration

Tomcat, WebSphere
Postman, JMeter, Gatling, Selenium, Cypress, Webdriver.io, Mocha, Chai, JUnit, TestNG
AWS, GCP, Azure, Docker, Docker Swarm, Kubernetes
Drupal, Wordpress, VB.net
Metamask, Solana, Metaplex

TEAM MEMBERS HAVE WORKED FOR THE FOLLOWING NOTABLE COMPANIES:

Australia

Macquarie Bank, LexisNexis, UNSW, Allied Recruitment Australia, ALM, Lion

New Zealand

Air NZ national flag carrier

Singapore

Singapore Tourism Board, M1 Telecom, Resort World Sentosa, Reebonz, 123RF

Thailand

Kbank Thailand

Hong Kong

Wistkey

Japan

Grune

Indonesia

Telkom, Chevron Pacific, Sorabel, Ruangguru, Majoo, Bank Indonesia, Bank Central Asia, Bank Permata, Gramedia

Currently exploring how best to enhance your service?

We'd welcome the chance to demonstrate why our team are the ideal fit to support your roadmap with speed, reliability, and zero-risk engagement.

Reach out to schedule a brief call or, if you prefer, we can send over developer profiles tailored to your current needs.

Thank you for your time, and look forwarding to hearing from you!
