Integration**

**Software
Development**

**Product
Development**

Digital Marketing

**pay-per-click (ppc)
Google Ads**

ENGAGEMENT MODEL

FIXED PRICE

This model is for projects with well-defined scope and requirements. When Clients know what they want and have fixed requirements, it works the best for small businesses and medium projects with limited or fixed budgets.

DEDICATED HIRING

For projects when clients want to have a full-time, dedicated team working on their projects. Works best for projects which require fast scaling or require expert developers to work on a long-term basis.

TIME MATERIAL

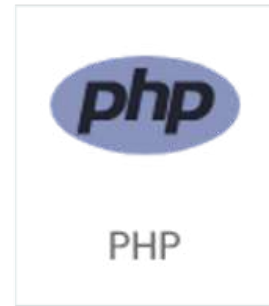

For projects where requirements are dynamic and constantly changing, and scope is not clearly defined. Works the best for When clients need short-term consulting or want to build a proof of concepts.

DEVELOPMENT PROCESS

Design and Planning

Developers create a plan for the software development process, including the architecture and design of the software, the selection of technologies to be used,

Testing

After development is completed, the software is tested to make sure it meets the requirements and works as expected.

Maintenance

After deployment, the software is maintained and updated regularly to ensure that it continues to meet the customer's needs.

Requirements Gathering

This is the first step of the software development process, where Customers and developers collaborate to define the scope of the project, the desired features, and the timeline for completion.

Development

This is when developers write the code, create databases, and build the software

Deployment

After the software is tested and approved, it is deployed to the customer.

Iterate

This includes collecting feedback from users, analyzing data, and making improvements to the product over time.

Process(Agile-Scrum Model)

Webapphealing Technology understand business-specific problems, problem-based requirements, and different challenges to deal with in businesses.

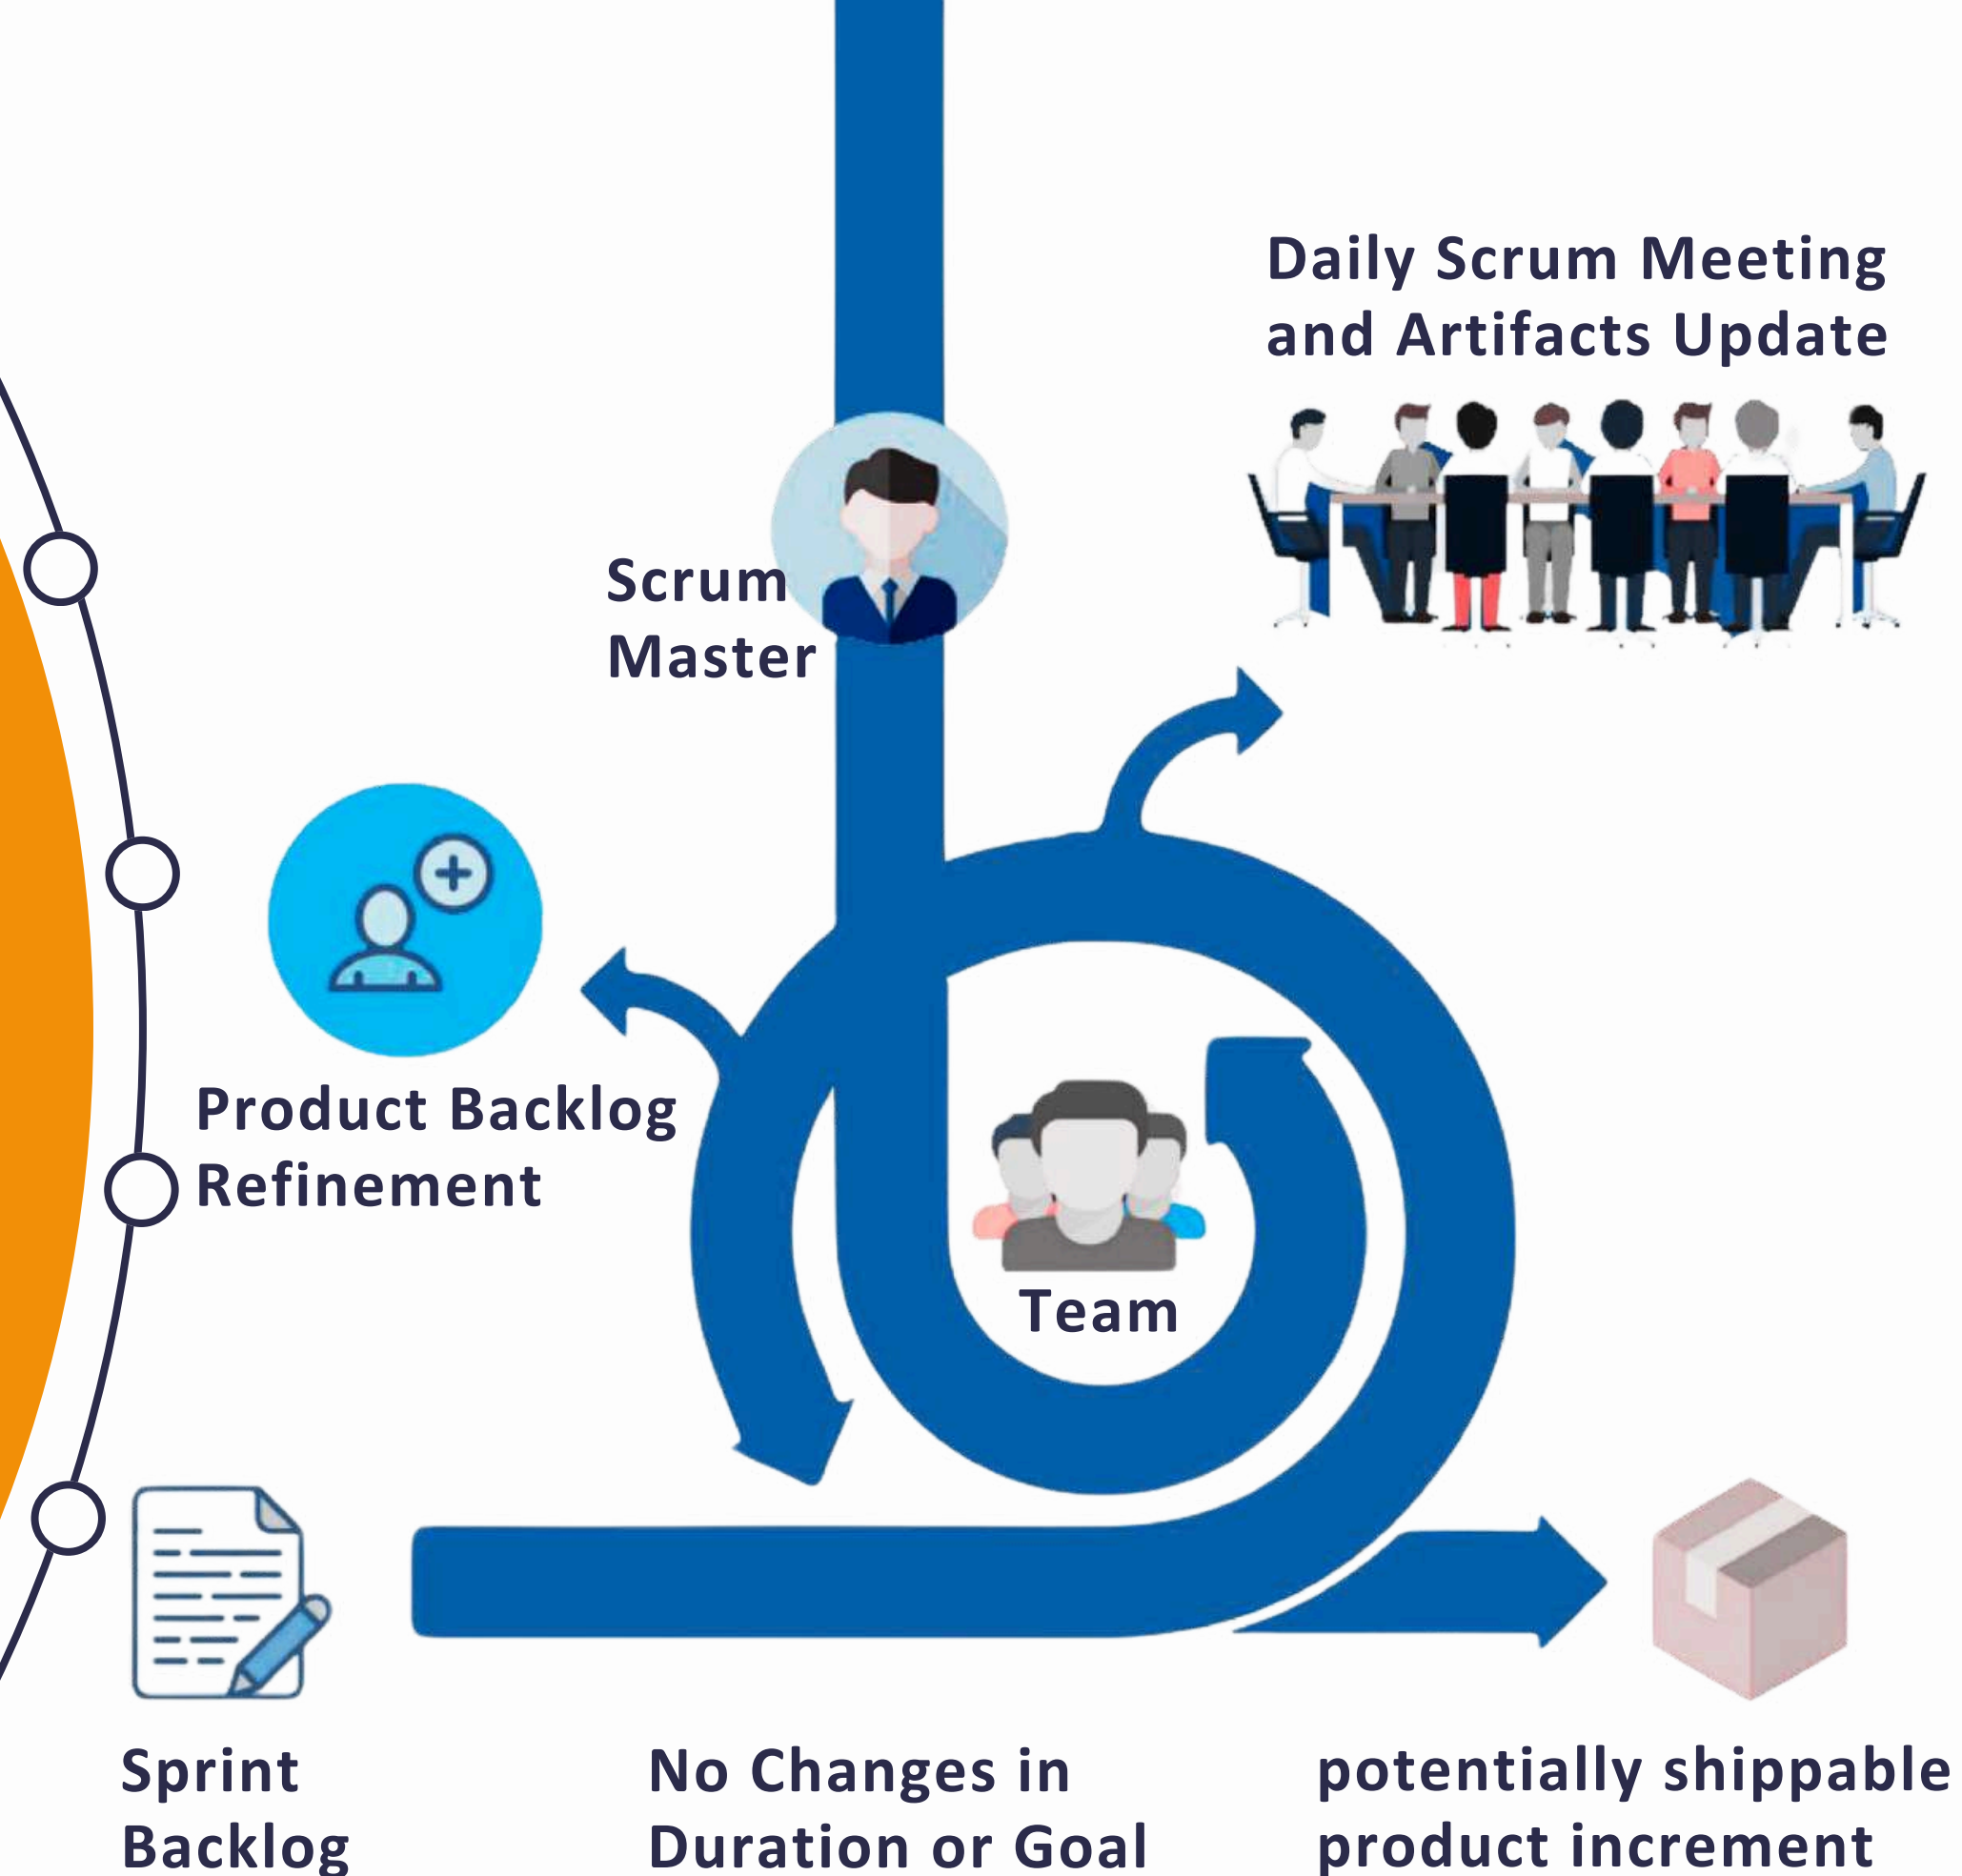

We use Scrum is when:

The technical requirement is hard to define completely
The probability of changes/continuous improvement in development is very high

A self-managed team is required in action

An Innovation or unusual change required in software development

- Certified Scrum Master available for guidance
- Complete Scrum knowledge implementation is going on
- Optimum utilization of daily scrum
- Can achieve the complex functional requirement
- Always deliver usable product increment or development in each successful Sprint

EV Charging App

EV Charging stations are required due to the ongoing increase in demand for electric vehicles. Apps for finding EV charging stations, like PlugShare and EVGo, are quite profitable. Do you wish to create an EV charging station locator app similar to PlugShare, ChargeGrid, and EVGo? We can assist you as a leading EV Charging Station Finder App Development Company.

01 Book Charging Station

The function enables EV users to reserve a spot and time at the charging station in advance to avoid waiting in line.

02 Trip Planner Panel

The function sends alerts regarding nearby charging stations and the vehicle's battery status while traveling a long distance.

03 Geolocation

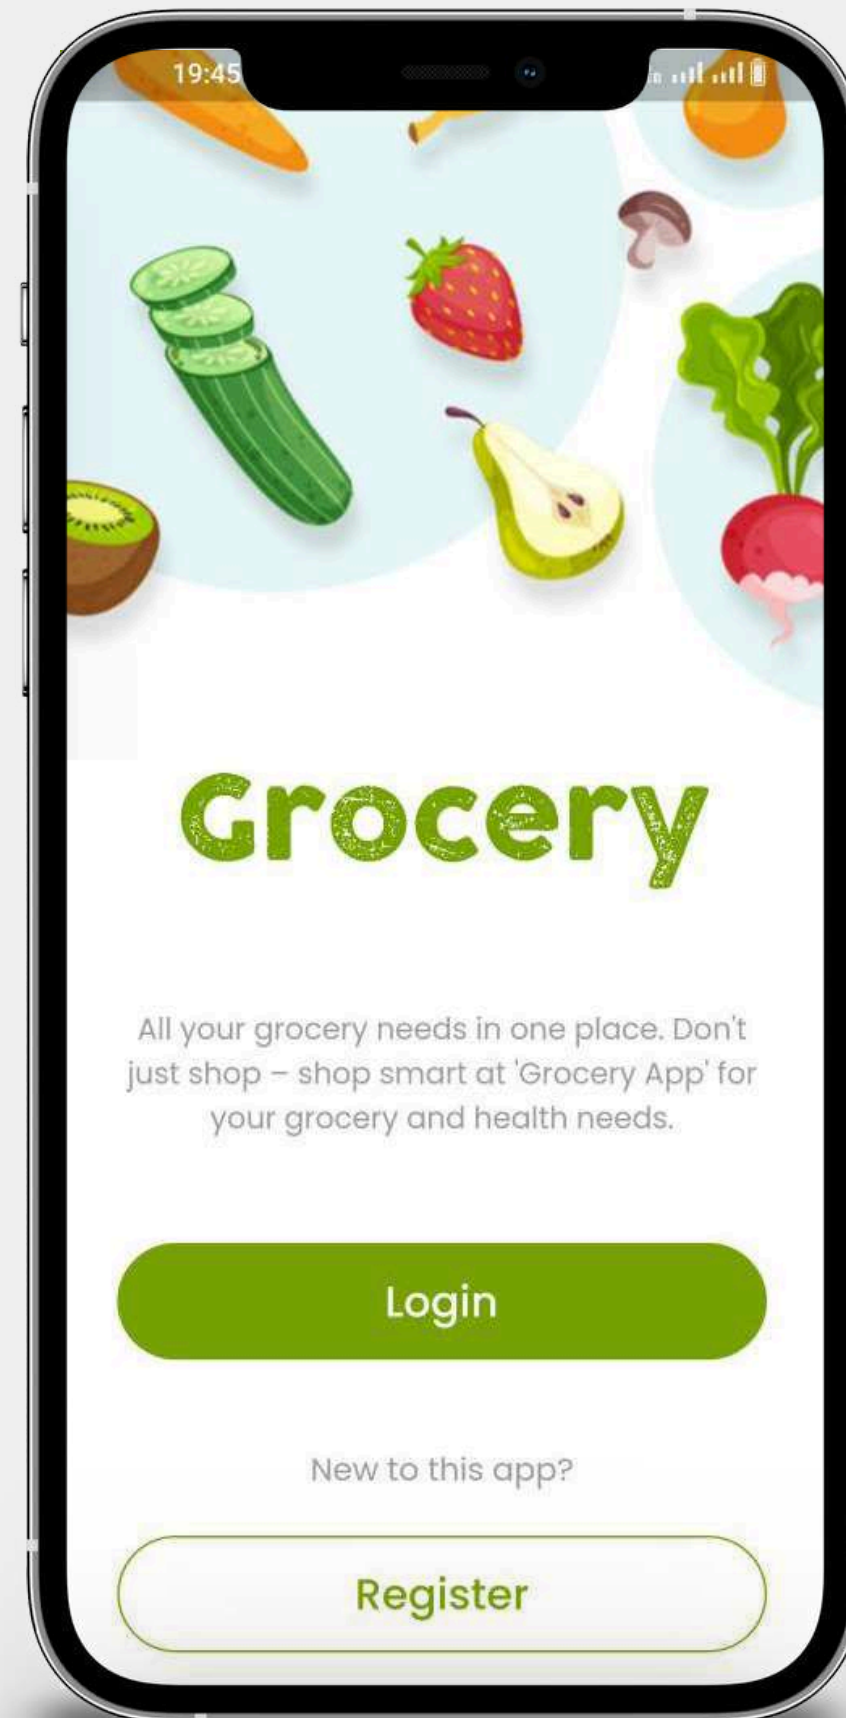

The app shows nearby charging stations based on the user's current location. The location can also be manually added by users.

MORE >>

Grocery App

We are a one-stop shop for all grocery store operators looking to up the ante on their retail operation. We have a diverse group of extremely knowledgeable and competent supermarket app developers who create these apps in a distinctive approach. Our top-notch app developers have provided our clients with completely functional and feature-rich supermarket apps to improve the shopping experience for consumers with their prestigious years of experience and broad knowledge. Like the well-known grocery delivery apps like BigBasket, Grofers, and Instacart, we too provide ready-to-use grocery delivery apps.

01 User Registration

Easily register by email, mobile or social media channels.

02 Advanced product Search

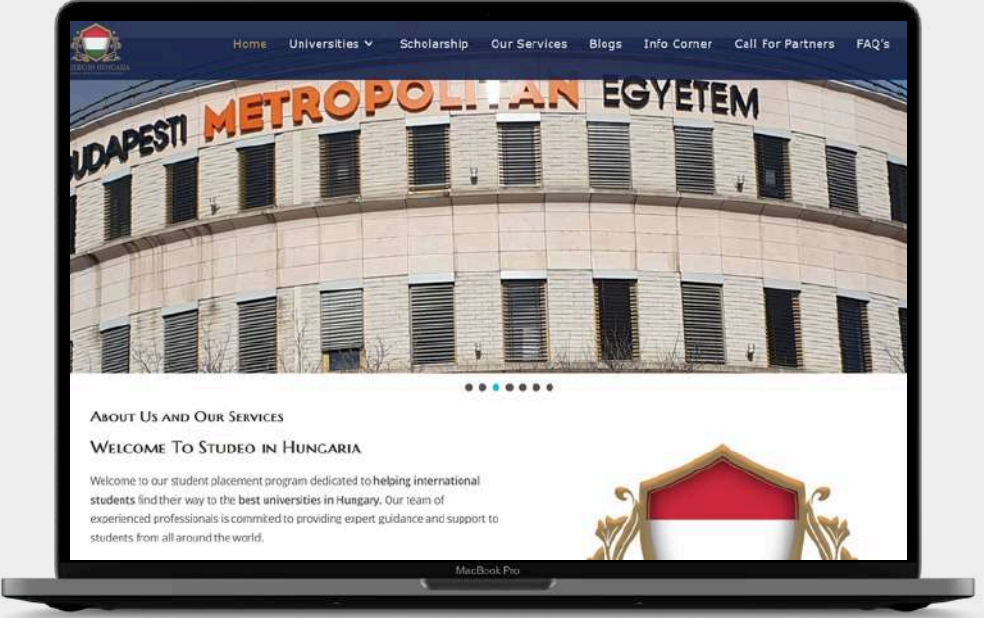

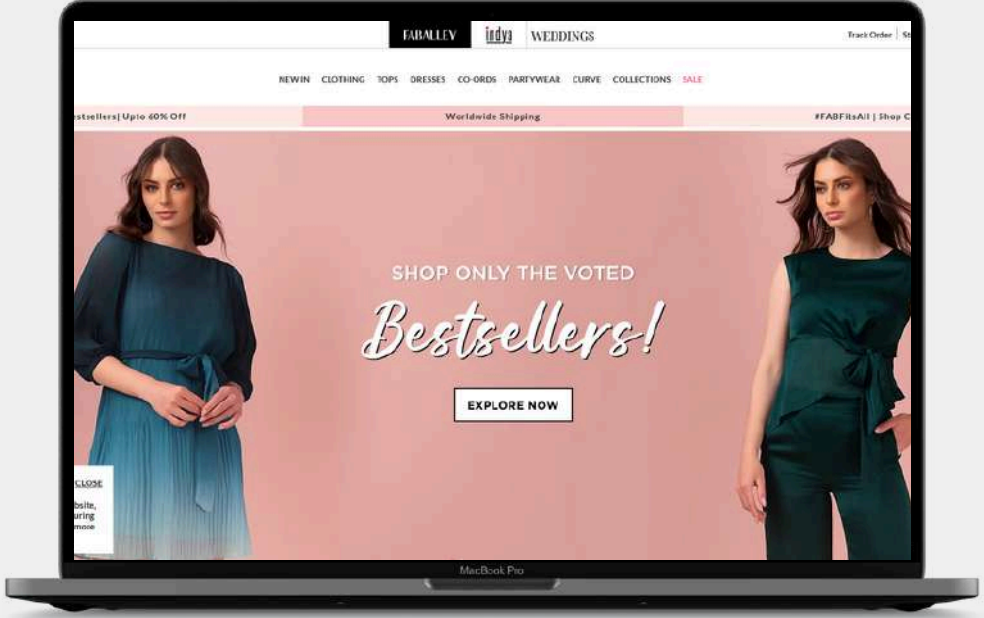

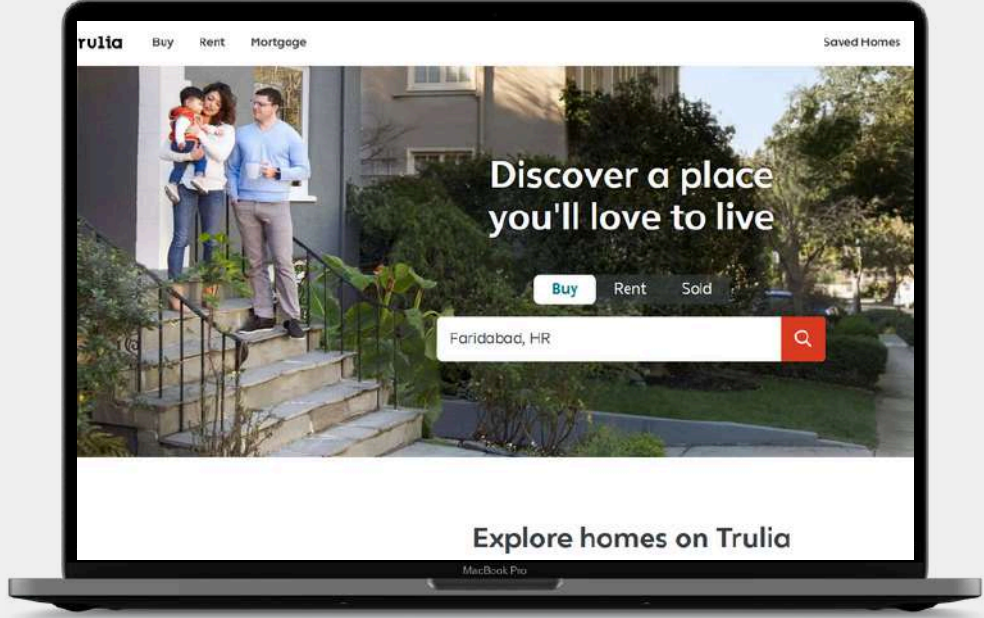

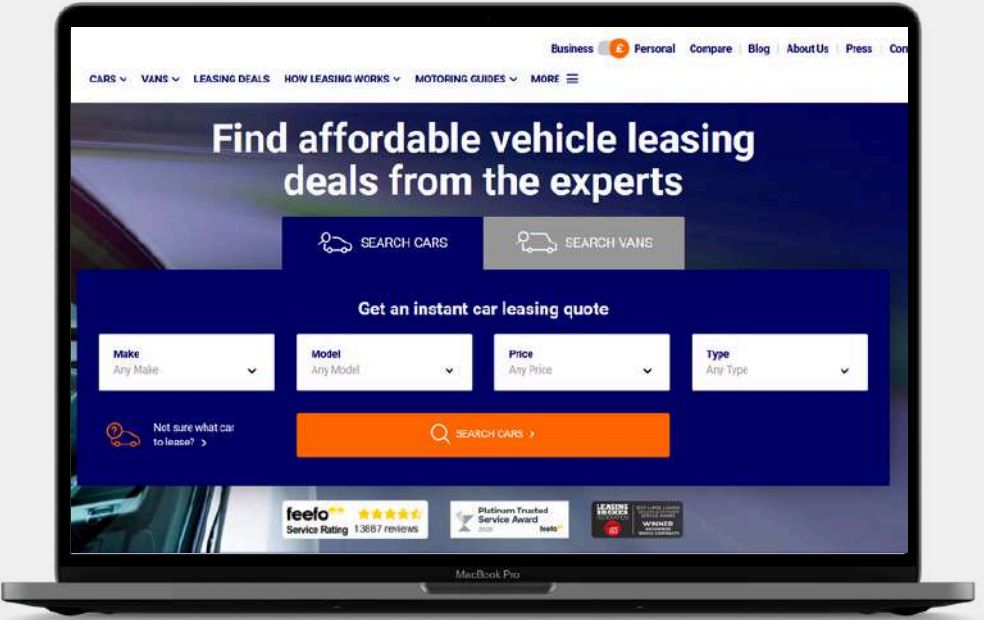

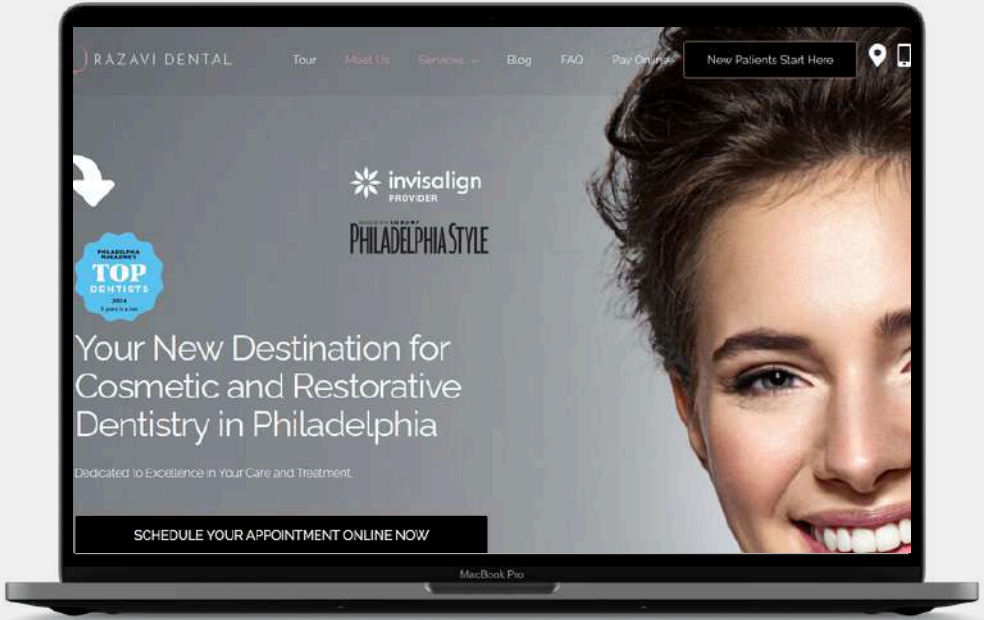

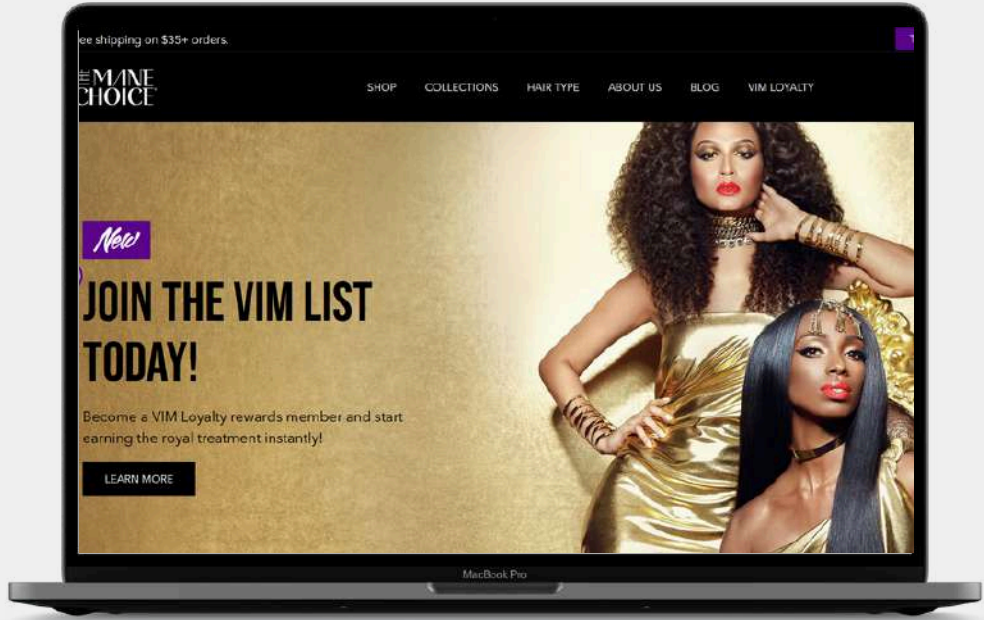

Allows users to quickly find and refine their search for specific products based on various criteria such as brand, price range, dietary preferences, and more.

03 Multiple Modes of Payment

Offers multiple modes of payment for convenient and flexible transactions.
