

# How to Scale Without 3x-ing Your Headcount

AI Agents + Smart Contracts are cutting 40-80%  
of manual ops for SaaS, marketplaces, and  
FinTech. Here's how it works

# Where your team's time actually goes

- Support tickets growing faster than revenue
- KYC/AML eating 20-40 hours/week
- Payouts, approvals, moderation = bottlenecks
- Internal tools breaking at scale

These are human-dependent. Yet.

# AI handles logic. Blockchain handles execution.

1

## AI Agent

Reviews data, flags risks, handles support – 24/7

2

## Smart Contract

Triggers payouts, access, transfers – instantly

No approvals. No errors. No delays.

5Hz

# Measured impact

- ✓ 68% fewer support tickets
- ✓ 52% lower transaction costs
- ✓ 4x faster onboarding
- ✓ Break-even: 1-4 months
- ✓ ROI: \$60K-\$140K+/year

5Hz

**Build systems,  
not departments.**

Let's talk about your case

Investment: \$30K-\$200K | Timeline: 6-8 weeks

We build autonomous systems
